Robot Welding Cells & Tooling

Prospot has the capability to design and manufacture robot welding systems for all types of welding applications either using new equipment, refurbished equipment or utilise our customer's own redundant machines to make cost effective solutions.

Robot welding cells for BMW mini Airbag covers

Mig welding robot cell with orbital turntable for welding facia assemblies

Triple robot cell for welding rear quarter bodyside assemblies

Larger projects can be undertaken with our partner SERRA who are specialist builders of large assembly lines.
